

FOR IMMEDIATE RELEASE

Sensei Principals Co-Author New Legal Technology Guide

New Book Helps Solo Practitioners and Small Firms Choose The Right Technology for Them

March 1, 2008 (Fairfax, Virginia) – Sharon D. Nelson, Esq. and John W. Simek, President and Vice President of Sensei Enterprises, Inc., a computer forensics and information technology firm headquartered in Fairfax, Virginia, have recently released their third book, *The 2008 Solo and Small Firm Legal Technology Guide: Critical Decisions Made Simple*.

Published by the American Bar Association and written in collaboration with Michael Maschke, Sensei's Director of Computer Forensics, this annual guide offers information and recommendations on computers, servers, networking equipment, legal software, printers, security products, smart phones, and anything a single lawyer or a small law office might need.

“Technology is a vital part of the practice of law today, but the number of hardware and software options available is just too high for a busy attorney or small practice to evaluate without help,” said Sharon D. Nelson, Esq., Sensei’s President. “With my extensive legal background and John and Michael’s in-depth understanding of today’s technology, it seemed the right time to create a book that would help lawyers choose which options would best fit their needs.”

Specific issues covered in the Legal Technology Guide include:

- A complete, unbiased overview of current legal technology products
- Step-by-step instructions for making sound technology decisions
- How to choose the right operating system and software for your office, including case management applications, billing systems, and document management solutions
- Determine what you need to go wireless
- How to protect your firm from security threats, including viruses, spyware, and spam

The book is priced at \$79.95 (\$49.95 for members of the ABA’s Law Practice Management Section) and is available through the ABA’s web site store at <http://www.abanet.org>.
